

## BANDO Duraflex GL™ ( 2L, 3L, 4L, 5L)

For top performance on fractional horsepower drives, this is the long wearing solution!

Light industrial applications, appliances, and power equipment require the same tough, long wearing, trouble free belts as high horsepower drives. Because Duraflex GL has the same construction features as power King heavy duty belts, you get maximum belt life on short center distance, high speed FHP drives.

Oil and heat resistant rubber compounds and extra strong polyester tensile cord found in heavy duty belts are used to give long, economical service on fractional horsepower drives. 2L section features a cogged, polyurethane construction, ideal for flexing around small sheaves.

Duraflex GL Size Listing

2L Section*		3L Section		4L Section		4L Section		5L Section		5L Section
