

TOTO EcoPower® Sensor Flushometer Valves:

Our EcoPower sensor flush valves are system engineered to work with our 1.28 GPF high efficiency toilets (HETs) and 0.5 GPF high efficiency urinals (HEUs) to provide the ultimate in water conservation and performance.

Available for both standard and 24" vacuum breakers.

TOTO 1.28 GPF High Efficiency Toilets:

Effective, eco-friendly flushing has arrived for commercial environments. Our 1.28 GPF High Efficiency Commercial Toilets are available in both a wall-hung and floor-mount model, and they provide the same superior flushing you have come to expect from TOTO in a water-saving 1.28 GPF model.

TOTO 0.5 GPF High Efficiency Urinals:

Our High Efficiency Urinals (HEUs) use an average 0.5 gallon or less per flush when utilized with a TOTO 0.5 GPF EcoPower sensor flushometer; a 50 percent water savings over traditional 1.0 GPF urinals. These urinals offer tremendous water savings without the maintenance and sanitary drawbacks that can be associated with waterless urinals.

TOTO is an active industry leader in water conservation and protecting the environment.

We are committed to the principle that we should—and can—do more with less. Our powerful commercial fixtures and fittings prove that the best conservation practices can be achieved without any compromise in product performance or quality.

TOTO is the only plumbing products manufacturer to receive the first-ever Water Efficiency Leader Award from the US Environmental Protection Agency. www.epa.gov

TOTO is a member of the United States Green Building Council's Water Efficiency Technology Advisory Group, working to promote water efficiency within the LEED green building rating system. www.usgbc.org

TOTO is a silver charter sponsor and a member of the Board of Directors of the Alliance for Water Efficiency. www.cuwcc.org
